

Press Release "5000th Digital Printing order"

28.3.2013

5000th Digital Printing Order

10 years of experience in Digital Printing, has enabled O. KLEINER AG, over the past couple of days, successfully to complete their 5000th order and despatch it to their customer.

This is an impressive figure for, in 2001, very few customers and filler/packers believed in the suitability of the new technology for Flexible Packaging.

Even in those days, O. KLEINER AG was convinced of the innumerable opportunities for Digital Printing in this area of Packaging and was already tirelessly conducting tests with the first Indigo Webstream and making improvements.

The present 5000th order has now proven this conviction and the path trodden to be right.

The HP – WS 6600 machine, the 3rd generation of digital printers, has already been in service at O. KLEINER AG from mid 2012. The progress was immediate - especially doubling print speed, optimisation of ink systems and simplification of work processes.

O. KLEINER AG will be presenting new applications at the easyFairs® "Verpackung Schweiz 2013" packaging exhibition in Zurich www.easyfairs.ch .
