

Digital Center O. KLEINER AG

PRESS RELEASE

9th January 2017

Digital Printing for Flexible Packaging is a success.

O. KLEINER AG installs a second HP20000 and expands capacity further in its Digital Centre.

From February 2017, all orders for the two HP20000 presses and the laminating line, purpose-built for digital printing orders, will be run in a 2-shift operation. 16 years' experience with 4 generations of digital printing systems have enabled us to take and further increase our technical leadership in digital printing. Thanks to the digital printing process, the most complex print images can be perfectly executed to meet the highest quality expectations. Moreover, if requirements for our DIGITAL4 system are met, orders can be despatched within four working days.
