

New digital printing machine

HP Indigo 25K

In 2001, the first HP digital press generation completed our machine portfolio and has since enabled us to use three printing technologies «under one roof» More than 20 years ago we were pioneers in digital printing and since then we have continuously expanded and renewed our know-how as well as our equipment.

This year, our existing HP Indigo 20'000 has been replaced by the 5th generation – the **HP Indigo 25K**

The HP Indigo 25K offers - among others - the following optimisations:

- easier, faster and more precise operation
- optimised software
- continuous Color Calibration – for a more constant colouring

Digital printing furthermore offers the following advantages:

- no costs for printing machine tools
- ideal for the industrial processing of small and medium print runs
- metallised effects available
- ideal for market surveys, product launches, seasonal or promotional articles for events or B2B-products

Our DIGITALCENTER offers optimised processes and a state-of-the-art plant, consisting of digital printing (HP Indigo 25K) plus a laminating machine, tailored to the Digital Printing process. This results in the shortest “time to market” lead time.

We are looking forward to advising you on an upcoming digital printing project. Our sales team will be happy to answer any questions you may have.

Interpack 2023

Düsseldorf DE | 04.-10.05.2023 |
Hall 9 | Booth J35/J36

We are looking forward to participating in Interpack 2023 again next year! The international trade fair for packaging will take place from 4th to 10th of May 2023 in Düsseldorf/DE. We will be glad to show you our latest innovations in the areas of sustainable packaging, digital printing and CANPEEL®. We will keep you informed!

The year 2022 is coming to an end and we are looking back on an eventful year. Together we were able to master a lot and we would like to thank you for the good collaboration. We have already many plans for 2023, you can be curious! In the meantime, we wish you a wonderful Christmas and a good start into the New Year.
